

Laerdal Medical

From Lifesaving Hardware leader
to the Global Standard
for Human Readiness

**A hidden champion
at a digital
inflection point.**

Laerdal
helping save lives

Helping save lives

One Million Lives

Helping save one million more lives. Every year. By 2030. That is our goal.

Improving the quality of care is part of our mission, to help save more lives. And we have established the goal to help save 1 million more lives. Every year. By 2030. However, we can't do this alone.

This is a shared goal of [Laerdal Group](#). A group of companies that develops healthcare-related solutions and programs focused on a joint mission to helping save lives, together with our Partners.

Capital Accumulation Cycle

ORGANISATIONAL

STRONG

Integrated supply chain, 30 global locations, \$500M+ revenue, IFS Cloud ERP (2024).

HUMAN

STRONG

80 years of accumulated knowledge. 160 specialists across 22 countries. Deep simulation science.

SYMBOLIC

VERY STRONG

Family-owned, mission-driven. 60 years of CPR leadership. "Helping Save Lives" since 1940.

SOCIAL

STRONG

Partnerships with AHA, NLN, national health charities. Embedded in government healthcare systems.

Diagnosis · Capital-rich across all four forms — but in hardware only. The cycle has stalled at the conversion point to software, data, and recurring revenue.

From resuscitation to patient simulation

With more than 300.000 patient simulators deployed into 50.000 institutions in 120+ countries

Events SimCapture

Shifting Shape + Big Improver

THE ROUTE

Laggard to Leader — Big Improver

Radically reconfigure the business model from hardware-led to platform-led, closing the software monetisation gap with Surgical Science (35% software revenue) and CAE.

Shifting Shape — Early Adapter

Enter adjacent high-risk industry markets (mining, maritime, aviation) with a software platform layered onto existing hardware expertise.

WHY NOW

\$7.2B

Medical simulation market by 2030
(doubling from 2025)

\$5.9B

First aid training market by 2033
(regulatory tailwinds)

35%

Surgical Science software revenue
share — Laerdal's benchmark gap

22

Direct-country footprint — Asia-Pacific
still underpenetrated

The Capital Cycle Stalls at Data

CURRENT • STALLS AT THE DATA LAYER

PROPOSED • CLOSED LOOP COMPOUNDS ACROSS ALL FOUR FORMS OF CAPITAL

 Reinvested into stronger O / H / S / S capital — the cycle compounds.

Breakouts are sequenced. Small bets must compound before incumbents notice. Competitors look inward at hospitals; Laerdal must look outward at the world.

The Refusal Risk

STRENGTHS

- ▶ Privately held — no quarterly pressure
- ▶ Mission-driven retention and brand
- ▶ Deepest training dataset globally
- ▶ 80+ years of clinical validation

WEAKNESSES

- ▶ Limited acquisition capital vs PE-backed CAE
- ▶ ERP only modernised in 2024
- ▶ Hardware-led commercial muscle memory
- ▶ Software monetisation lags Surgical Science

THE REFUSAL

- ▶ No more standalone hardware without software on top
- ▶ Every new product must generate platform data
- ▶ Discipline to close off hardware-only revenue
- ▶ Refusal is a strategic choice, not failure of imagination

STRENGTHS

Capital that competitors can't buy.

Eighty years of mission-driven leadership have built four moats that money alone cannot replicate. This is Laerdal's structural advantage entering the breakout.

- ▶ Privately held — no quarterly earnings pressure to dilute long-term strategy
- ▶ Mission-driven culture that retains talent and inspires customers
- ▶ The deepest training dataset in the world — every CPR session, every simulation
- ▶ 60+ years of clinical validation, embedded in AHA, NLN, and government partners

WEAKNESSES

Built for hardware, slower at software.

The strengths from one era are also constraints in the next. Four weaknesses we have to confront honestly before any breakout plan is credible.

- ▶ Limited acquisition capital compared with PE-backed competitors like CAE
- ▶ ERP system only modernised in 2024 — digital plumbing is still maturing
- ▶ Hardware-led commercial muscle memory across the entire sales force
- ▶ Software monetisation lags Surgical Science by roughly a generation

THE REFUSAL

Refusal is a strategic choice.

Every successful breakout has a 'we will not do this anymore' moment. For Laerdal, this is the line — and the cultural test of whether the strategy is real.

- ▶ No more standalone hardware without software on top
- ▶ Every new product must generate platform data from day one
- ▶ Discipline to close off hardware-only revenue — even the easy quarterly number
- ▶ Refusal is not failure of imagination; it is the cultural test of the strategy

From Aspiration to Commitment

CURRENT

"Help save 1 million more lives every year by 2030."

Aspirational, not contractual. Doesn't signal the digital pivot.

PROPOSED

"Become the global standard for human emergency readiness across healthcare and industry by 2030 — with 30%+ revenue from software."

Specific. Time-bound. Measurable.

VISION WHEEL · SIX SPOKES

PURPOSE

Every person in every high-risk environment is capable of lifesaving response.

VALUES

Family ownership and impact, plus digital openness and interoperability.

AMBITION

Global readiness standard by 2030, 30% software revenue.

POSITIONING

Every controlled and high-risk environment — not just hospitals.

BEHAVIOURS

Co-develop compliance standards. Embed the regulator.

OUTCOMES

Customer certification rates, software ARR, response-time impact.

Six Pillars + Four Moves

VALUE PROPOSITION · CURRENT → PROPOSED

PILLAR	CURRENT	TARGET	MOVEMENT
 PRICE	Premium	Competitive	→ SaaS democratises access
 FEATURES	Customised	Original	→ Sector-specific modules
 QUALITY	Excellent	Excellent	→ 60yr clinical validation — maintain
 SUPPORT	Standard	Comprehensive	→ Real-time dashboards, skill-decay alerts
 AVAILABILITY	Restricted	Selective / Universal	→ Cloud + mobile, Asia-first
 REPUTATION	Prestigious	Prestigious	→ Hospital brand → readiness brand

FOUR MOVES

ELIMINATE
Hardware sales without data integration

REDUCE
Dependence on capex procurement cycles

RAISE
Recurring software ARR & sector content depth

ADD
Compliance automation, insurance integration

Socio-System + Techno-System

TECHNO-SYSTEM	BM ELEMENT	SOCIO-SYSTEM
Build SaaS platform on SimCapture / HeartCode	 COST	Retrain sales from hardware quotas to software ARR
Sector-specific simulation modules (mining, maritime, aviation)	 INNOVATION	Communities of practice with industrial safety bodies
Data feedback loops hardware → platform	 RELIABILITY	Competency framework for digital product roles
CRM and compliance integration with HR / HSE systems	 RELATIONSHIPS	Strategic partnerships with insurers and regulators
Cloud + mobile-first deployment for remote sites	 CHANNELS	Singapore beachhead (maritime), Australia (mining)
Launch "Readiness Platform" brand identity	 BRAND	Sponsor industry safety summits; standard-setting

90 Days. 1 Year. 3 Years.

90 DAYS

Prove the loop

- ▶ Activate data feedback loops on existing hardware
- ▶ Two pilots in flagship hospital systems
- ▶ Software value demonstrated to board

YEAR 1

Launch the platform

- ▶ Readiness Platform MVP live
- ▶ Anchor enterprise health-system clients
- ▶ Singapore office opened — Asia-Pacific healthcare beachhead

YEAR 3

Define the category

- ▶ Full platform across 6+ sectors
- ▶ 30%+ revenue from software subscriptions
- ▶ Established presence in 5+ Asian markets

THE 90-DAY RISK

Laerdal cannot ingest and activate data feedback loops fast enough before Surgical Science or CAE close the gap. The risk is speed, not capability.

Leadership Capability Audit

CAPABILITY	SCORE	DIAGNOSIS
 POSITIVE	4/5	Mission-driven, clear purpose — but needs sharper digital narrative
 NEGATIVE	3/5	Hardware comfort is hard to close off — the refusal is the test
 CONCEPTUAL	3/5	Strong in healthcare, untested in cross-sector platform logic
 CREATIVE	3/5	SimX VR partnership shows willingness; lateral thinking needs depth
 RELATIONAL	5/5	80 years of institutional trust — AHA, NLN, government partners

CONSTRAINING CAPABILITY

Negative — courage to close off hardware-only revenue.

ENABLING CAPABILITY

Relational — bring regulators, insurers, partners into the platform.

Market and Nonmarket are One

REGULATORY

Become the standard

Help shape compliance frameworks rather than just complying — turning regulatory presence from a cost into a moat. Table stakes for the platform, not the dominant edge.

GEOPOLITICAL

Hedge tariff & supply risk

Suzhou-based manufacturing plus a US-heavy revenue mix exposes Laerdal to US-China tariff escalation. Diversify production (Mexico, Norway, near-shoring), and broaden demand into Asia-Pacific and emerging markets via Laerdal Global Health.

TECHNOLOGICAL

Hardware-software lock

Hardware-software integration that pure software players cannot match. Every simulation run deepens the proprietary readiness dataset.

STAKEHOLDER

Aligned incentives

Preserve family ownership values while professionalising commercial execution. Insurance co-funding creates aligned incentives across the ecosystem.

REGULATORY

Help shape the standard.

Compliance is the floor. The real moat is in standard-setting — the company that helps write the rules competes on a different playing field.

- ▶ Co-shape compliance frameworks across healthcare and emerging verticals
- ▶ Move from vendor-to-the-standard to author-of-the-standard
- ▶ Relational capital from 80 years of partnerships gives credibility to participate
- ▶ Table stakes for the platform — not the dominant edge

GEOPOLITICAL

Hedge tariff & supply risk.

Suzhou-based manufacturing plus a US-heavy revenue mix is a structural exposure in the current US-China tariff cycle, not a hedge. This is the dimension that demands the most immediate attention.

- ▶ Largest single revenue market: United States — largest manufacturing footprint: Suzhou, China
- ▶ Every tariff round compresses margin on China-to-US product flow
- ▶ Mitigation: diversify production into Mexico and Norway; near-shore tariff-sensitive SKUs
- ▶ Diversify demand via Laerdal Global Health into Asia-Pacific and emerging markets

```

51 //fires the appear event when appropriate
52 var check = function() {
53     //is the element hidden?
54     if (!t.is(':visible')) {
55         //it became hidden
56         t.appeared = false;
57         return;
58     }
59
60     //is the element inside the visible window?
61     var a = w.scrollLeft();
62     var b = w.scrollTop();
63     var o = t.offset();
64     var x = o.left;
65     var y = o.top;
66
67     var ax = settings.accX;
68     var ay = settings.accY;
69     var th = t.height();
70     var wh = w.height();
71     var tw = t.width();
72     var ww = w.width();
73
74     if (y + th + ay >= b &&
75         y <= b + wh + ay &&
76         x + tw + ax >= a &&
77         x <= a + ww + ax) {
78         //trigger the custom event
79         if (!t.appeared) t.trigger('appear', settings.data);
80     } else {
81         //it scrolled out of view
82         t.appeared = false;
83     }
84 };
85
86 //create a modified fn with some additional logic
87 var modifiedFn = function() {
88     //mark the element as visible
89     t.appeared = true;
90
91     //is this supposed to happen only once?
92     if (settings.one) {
93         //remove the check
94         w.unbind('scroll', check);
95         var i = $.inArray(check, $.fn.appear.checks);
96         if (i >= 0) $.fn.appear.checks.splice(i, 1);
97     }
98
99     //trigger the original fn
100     fn.apply(this, arguments);
101
102     //bind the modified fn to the element
103     $.one(t.one('appear', settings.data, modifiedFn);
104         settings.data, modifiedFn);

```

TECHNOLOGICAL

Hardware-software lock.

Pure software players, even AI-native ones, cannot match a proprietary readiness dataset built device by device over decades.

- ▶ Every simulation run deepens the proprietary readiness dataset
- ▶ Hardware-software integration is the lock — software-only entrants can't replicate it
- ▶ Data flywheel only spins if you own the device generating the signal
- ▶ First-mover advantage compounds with installed-base scale across the global footprint

STAKEHOLDER

Aligned incentives.

Preserve family-ownership values, professionalise commercial execution, and bring insurers in as co-funders. The ecosystem becomes self-reinforcing when every party profits from readiness.

- ▶ Family ownership protects mission and avoids short-termism
- ▶ Insurance co-funding aligns incentives: insurer, hospital, workforce, Laerdal all win
- ▶ Regulators become partners, not adversaries, in standard-setting
- ▶ Self-reinforcing ecosystem when every party profits from readiness improvements

Thank you!

THE STRATEGIC PLEDGE

“

Laerdal is the world's most trusted lifesaving training company that hasn't yet built the platform its data, brand, and relationships have already earned.
